

LASER DECORATION DIGITAL PERSONALIZATION

Simply enter your personalized text, upload a graphic, and with precision and ease, your designs are transferred in metallized foil onto plastics and other items. The LD-80 offers a unique opportunity for your personalization business to take objects from average to amazing in minutes.

Create Unique Custom Products in 4 Easy Steps

The LD-80 has no complicated operating procedures and provides a simple 4-step process.

1 Place your object in the machine

2 Add your chosen foil

3 Laser imprint your design via METAZAStudio Software

4 Your customized object is ready to sell

Highlights & Specifications

- Includes easy-to-use METAZAStudio Software
- Laser imprints onto polycarbonate, acrylic, thermoplastic, silicone and other materials
- An included vise holds objects perfectly in place and allows for quick set-up
- At the touch-of-a-button, a laser pointer reveals the origin point on the media for precise media positioning
- Requires no special electrical set-up
- Hot-foil stamp material is available in a massive range of colors and types
- Input your serial data, including numbers and names to produce items for multiple customers
- A fully-enclosed machine is completely safe to operate—using a Class 1 laser for heat transfer personalization
- Expand beyond the storefront with a compact machine that can be taken anywhere
